

EBA 200

TABLETOP CENTRIFUGE

PRESS 'START' IN CASE
OF EMERGENCY

Hettich
CENTRIFUGES

Compact clinical tabletop centrifuge

High-performance, built-in, 8-place rotor with compact frame and all-metal containment for added safety. Ideal for blood, urine and pediatric tubes.

STAT, PPP & Coagulation

Obtain consistent platelet counts less than 10,000 platelets/ μ L in 3 minutes or less (model EBA 200S)

Run-Silent™ Operation

Excessive noise in the laboratory can lead to distractions, stress, anxiety, high blood pressure and chronic fatigue. Our centrifuges are as quiet as a normal conversation and will not increase the noise levels within your lab.

Easy-Lift™

Our Easy-Lift Lid, featuring stay-in-place positioning and lid drop protection, is ergonomically designed to limit repetitive stress injuries, spillage and accidental sample disruption when loading and unloading your centrifuge.

Safety-Lock™

Our Safety-Lock Lids are self-closing, auto-locking and come with either single and dual steel lid locks. This ensures a safe, tight closure of the centrifuge chamber during operation. The centrifuge will not operate if lid is not secure. For added safety, our centrifuges feature all-metal containment and adhere to all national and international safety standards and certifications.

Five (5) Year Warranty

FDA registered centrifuge manufacturer

MAX CAPACITY
8 x 15 mL

MAX RPM/RCF
8,000/6,153

DIMENSIONS - 380
9.0" x 10.3" 13.9"
